Paul,

Once when I was out there, more than a year ago, one a radio show I turned on a Latin named Dissdado. I've forgetten his last name. He wrote me and I turned him over the Hel who, himself or through one of the others, interviewed him and got some material from him. One of these things is a copy of the affidavit of Jerry Milton Brooks. The copy I have is a black or negative photostat.

I would like a clear copy, normal, if possible, for inclusion in the COUP appendix. Does any of you have such?

I think his name will come to one of you. I recall it as of about four letters, believe he lives or lived with his mother. If it does, perhaps one might make another phone call, to see if he has any other such documents.

Remembered. It is Olam. (Four hours later!)
